Thank you for your interest in the AI Engineer opportunity at Hasamex.

You have been shortlisted for the next round and as the next step in our interview process, we'd like you to complete a short technical case study demo submission.

Record a short **demo** video showcasing your application, key features, and how you approached the case study.

TASK INSTRUCTIONS :

The task is to build a simple application that analyses three sample expert-call transcripts and demonstrates how you would use AI to:

- answer an interview guide,
- extract exact quotes,
- show supporting timestamps,
- identify common themes and disagreements across calls,
- and allow users to ask questions across the transcripts.

We've attached a case pack containing in the following link:

- the assignment brief,
- 3 sample transcripts,
- and the interview guide.
- (resources in the link <https://workdrive.zohoexternal.in/external/bab782951164616283f3895986032d58df75b5c1c67af4a017e6631babab9371>)

We are mainly interested in your practical AI skills, engineering approach, accuracy, product thinking, and ability to explain your solution clearly.

Please be prepared to record the demo of the application during your technical demo video submission round and walk us through your architecture and key decisions. The video should briefly explain what you built, how you approached the case, and how you tackled the key requirements. Please refer to the submission form for the detailed video instructions and submission requirements

For submission, please share the following on link provided:

- the working application or instructions to run it locally,
- source code repository,
- and a short README

Submission form: <https://zfrmz.in/l2JX2GbU4Y30arQDeURx>

Please submit your completed case demo by **25th Sept 2026 1100 hrs IST.**

Warm Regards
Talent Acquisition
